SUMMARY

Data Scientist with around 3 years of experience in machine learning, predictive modeling, and statistical analysis. Proven expertise in building risk models, automating workflows, and driving data-driven decisions using Python, SQL, R, and Tableau

PROFESSIONAL EXPERIENCE

Meesho

Senior Analyst - Data Science

Apr 2025 - Present

Bangalore, India

Predictive Modeling & Machine Learning

- Developed and deployed two XGBoost BNPL risk models: one using Meesho behavioral features and another for ETC using Meesho + bureau data, reducing portfolio risk by 30% and scaling whitelist volume from 20L to 12Cr
- Built a LightGBM adoption model predicting post-application conversion propensity, enabling targeted discounting and business interventions for high-intent users, resulting in 5% uplift in NMV
- Designed and deployed an inferential Personal Loan risk model using off-us bureau features at time of origination and performance inferred from similar external loan portfolios, achieving 67% Gini and integrated into real-time underwriting

Credit Risk Analytics & Decision Frameworks

- Built a scalable feature store for Meesho and bureau data, generating 110K+ user-level features daily, enabling real-time and offline consumption across teams with low-latency, cost-efficient pipelines
- Deployed models into a real-time BRE, converting outputs into underwriting policies, decision rules, limit assignment, and risk-based pricing, leveraging bureau and alternative data for low-latency, scalable credit decisioning
- Designed an income estimation framework enabling real-time limit assignment and underwriting
- Designed risk-based pricing strategies leveraging model-driven segmentation to optimize portfolio risk-return

Godrej Capital

Assistant Manager - Data Science and Risk Analytics

Jun 2023 - Apr 2025

Mumbai, India

Predictive Modeling & Machine Learning

- Built behavioral scorecards using XGBoost, improving customer retention by 25% via optimized pre-foreclosure offers and reducing foreclosure risk, while improving collections efficiency by 30% through early risk-based customer prioritization
- Designed a logistic regression-based foreclosure prediction model to identify high foreclosure-risk customers and implemented targeted intervention strategies such as adjusting interest rates and credit limits, reducing foreclosure by 37% over 3 months
- Implemented an NLP-based auto-tagging system using NLTK, saving 14+ hours weekly in service request resolution time
- Engineered ARIMA forecasting models for home loan and LAP tranches, reducing cost provisioning errors by 30%

Business Strategy, Growth & Monitoring

- Collaborated with risk and policy teams to design a strategy and framework for a 500+ Cr monthly cross-sell portfolio using existing models and policies, improving targeting of low-risk customers and reducing acquisition cost
- Analyzed market potential, delinquency trends, and staffing requirements to identify 7 strategic clusters for product launches
- Architected Tableau dashboards for real-time risk KPI tracking, saving 8+ hours/week and improving decision speed
- Built a model monitoring framework for production models, reducing manual effort and accelerating issue detection and action

EDUCATION

Year	Degree/Certificate	Institute	CGPA/%
2018 – 2023	B.S. - M.S. Physics	Indian Institute of Technology, Kanpur	8.4/10
2018	XII, WBCHSE	Ramakrishna Mission Vidyapith, Purulia	91.6%
2016	X, WBBSE	Barabhum Higher Secondary School	94.8%

PROFESSIONAL & SCHOLASTIC ACHIEVEMENTS

- Quarterly Performance Champion (Q1 FY25): Recognized as top performer in analytics at Godrej Capital
- Kudos Award (FY24): For driving data-driven decisions impacting 500+ Cr business outcomes
- JEE Advanced 2018: AIR 2543 (Top 0.5% nationwide).

SKILLS

Programming : Python (Pandas, Scikit-learn), SQL, R, PySpark

Machine Learning : Regression, XGBoost, Clustering, NLP, Time Series (ARIMA), Feature Engineering, Model Monitoring

Tools : Tableau, R-Studio, Advanced Excel, Git, Jupyter Notebook, Google Cloud Platform (BigQuery, Cloud Storage)

Domain Expertise : Credit Risk Modeling, Customer Segmentation, Business Intelligence, Data Visualization

POSITIONS OF RESPONSIBILITY

Senior Executive: Udghosh'19, IIT Kanpur

Jul 2019 - Oct 2019

- Led a team of 30+ to manage the complaints cell for a national-level fest with over 1600 participants
- Administered the Hospitality and accommodation of over **1600+** students from different colleges of India
